

✓ Core Features Implemented

1. AI Chat System

- Multi-turn conversation with Gemini & Groq AI
- Chat history persistence in Supabase
- Message saving & retrieval
- Resume/file analysis message bug fixed

2. Smart Content Generation

- **Flowchart generation** (auto-detect from text)
- **Mindmap creation** (visual knowledge organization)
- **Quiz generation** (interactive learning)
- **Image generation** (Pollinations AI integration)
- **Video generation** (planning stage)
- **Web search** (Tavily integration)
- **Export tools** (PPT, Word, PDF)

3. Freemium Quota System ✓ Fully Enforced

Plan	Chat/Day	Images/Month	Videos/Month	Price
Free	10	0	0	Free
Plus	100	25	5	₹199/mo
Pro	300	100	25	₹499/mo

Enforcement:

- Free users blocked from images/videos with styled upgrade cards
- Monthly quota tracking in Supabase (image_count_used, video_count_used, quota_month columns)
- Daily chat limit enforced at API level

4. Payment Integration ✓ Razorpay Deployed

- Order creation endpoint (/create-order)
- Payment verification (/verify-payment)
- Webhook handling (/webhook)
- User plan upgrade (free → plus/pro)
- Subscription records saved to Supabase
- Test keys configured (awaiting Razorpay domain verification)

5. Authentication

- Supabase authentication (email/password)
- Firebase integration (ready)
- User profile management
- Session persistence

6. User Interface

- **Dark/Light mode** toggle
- **Responsive design** (mobile-friendly)
- **Pricing page** with plan comparisons
- **Features page** with capability showcase
- **Sidebar** with chat history management
- **Login/Signup modal** (consistent across all pages)

- Updated **Dynamo AI** logo

7. Database & Storage

- Supabase integration:
 - Users table (with plan, quota columns)
 - Chat history table
 - Subscriptions table
 - Quota tracking (daily & monthly)
- File upload support

8. Deployment

- **Replit deployment** (app-dynamo-ai.replit.app)  Active
- **Custom domain** (app.dynamoai.in)  Linked to Replit
- Unicorn production server configured
- Nginx reverse proxy ready (scripts provided)
- SSL/HTTPS ready

9. Audio Features

- **Text-to-speech** (Edge TTS integration)
- **Radio mode** (auto-play responses)
- Audio playback controls

10. Developer Tools

- Post-merge script (auto-installs dependencies)
- Deployment scripts for Hostinger
- `.env.example` for configuration
- API key management via Replit Secrets

In Progress / Awaiting

1. Razorpay Payment Testing

-  Waiting for Razorpay to verify `app.dynamoai.in` domain (24-48 hours)
- Once verified → Full payment flow will work

Planned Features (Not Yet Built)

- **Credits Dashboard** (Easy priority)
- **Tone Control** (Easy priority)
- **AI Memory** (Medium priority)
- **Content Templates** (Medium priority)
- **Brand Mode** (Medium priority)
- **AI Media Studio** (Hard priority)
- **1-Click Ad Generator** (Hard priority)

Current Status

All core features are live and functional

- Chat, content generation, quota enforcement, authentication all working
- Payment system deployed (awaiting final domain verification from Razorpay)
- App served from both Replit dev domain and custom domain
- Ready for production use once Razorpay domain is verified

Next step: Wait for Razorpay's domain verification email, then payments will be fully operational!
